

2 Use the numbers given to make a family of addition and subtraction facts.

(a)

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

(b)

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square + \square = \square$$

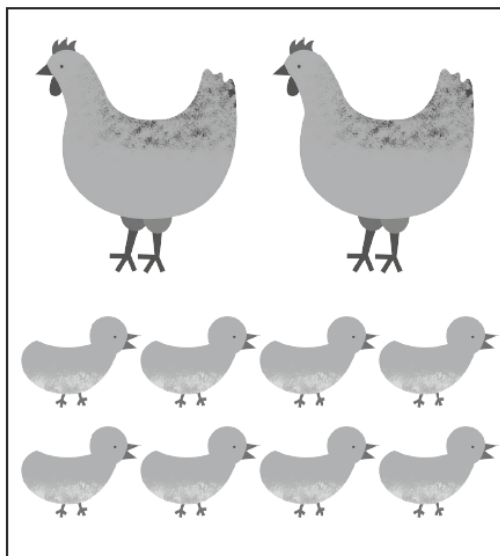

$$\square - \square = \square$$

(c)

$$\begin{array}{r} \square + \square = \square \\ \square + \square = \square \\ \square - \square = \square \\ \square - \square = \square \end{array}$$

(d)

$$\begin{array}{r} \square + \square = \square \\ \square + \square = \square \\ \square - \square = \square \\ \square - \square = \square \end{array}$$

Name: _____ Class: _____ Date: _____

Worksheet 6

Addition and Subtraction

1 Write a family of addition and subtraction facts for each set.

(a)

$$\begin{array}{r} \square + \square = \square \\ \square + \square = \square \\ \square - \square = \square \\ \square - \square = \square \end{array}$$

(b)

$$\begin{array}{r} \square + \square = \square \\ \square + \square = \square \\ \square - \square = \square \\ \square - \square = \square \end{array}$$
