

## Home Science Activity

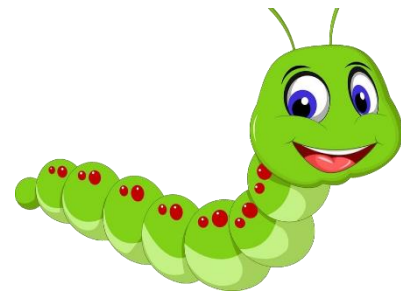

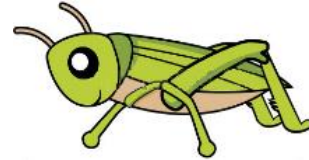

### Minibeast Movement!

Can you move like a minibeast? Practise:

- Scuttling like a spider
- Slithering like a snail
- Hopping like a cricket
- Creeping like a caterpillar
- Fluttering like a butterfly
- Buzzing like a bumblebee

Can you think of any more? If you're not sure how these minibeasts move you could look for some videos on YouTube.

After you have practised, play 'Guess the Minibeast' with your family - everyone takes it in turns to do an impression of a minibeast, while the others try to guess what you are. If your minibeast makes noises, you could do this as well as moving like them.
