

L.O. To make notes on the Geography and climate of Greece. Day 2 Week 3 Home Learning

Use these sites below to help you find your information or search for your own. Try to use both sites as one might have different information that you might want to include.

Remember if you are searching yourself, make sure you put "for kids" as it will be easier for you to understand. When researching, you need to put the information you find into your own words.

https://www.ducksters.com/history/ancient_greece/geography.php

<https://historylink101.com/2/greece3/climate-geography.htm>

What is the climate (weather) like in Greece? _____

What kind of land did they have? Did they have mountains, deserts, islands, forests or jungles? _____

What are the main bodies of water in the area? _____

Take good care of your notes as you will need them to write your non-chronological report.
