

Science - Lesson 2

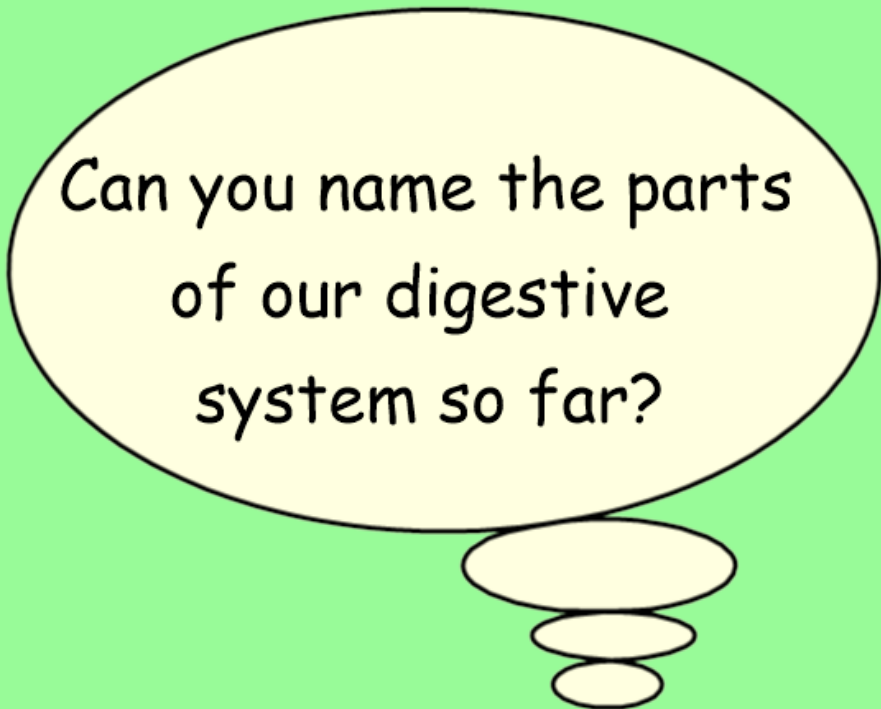

L.O: I know the parts of the digestive system.

Lets watch this video:

<https://www.youtube.com/watch?v=AX34MoalMzE>

Pay close attention to
the parts of the
digestive system!

Can you name the parts
of our digestive
system so far?

Our bodies need food because....

.... it is turned into nutrients,
which are good for us.

... it gives us energy.

Gall bladder:

Helps to digest fats.

Oesophagus:

Connects the mouth and the stomach

Liver:

Cleans your
blood and makes sure
your food does not leave
anything nasty in your
body.

Pancreas:

Helps break down food using
hormones, such as insulin.

Here is a list of the main body parts in the digestive system:

- large intestine
- mouth
- stomach
- gall bladder
- small intestine
- liver
- pancreas
- oesophagus
- rectum

Can you use these to label the diagram on the next slide?
