

Objectives

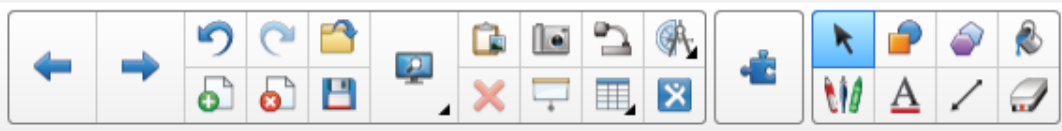

- * To understand that a computer network is a group of computers that are connected
- * To know that computer networks allow users to communicate and share

Vocabulary

network; internet; wired; wireless;
data; devices; communicate;
connected; LAN; WAN; network
switch; router

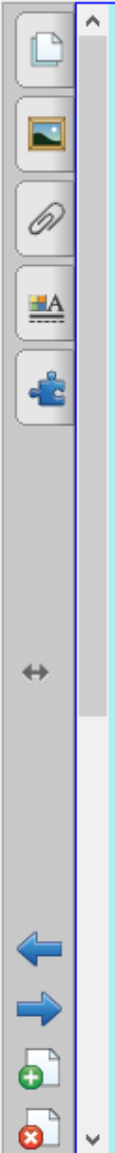

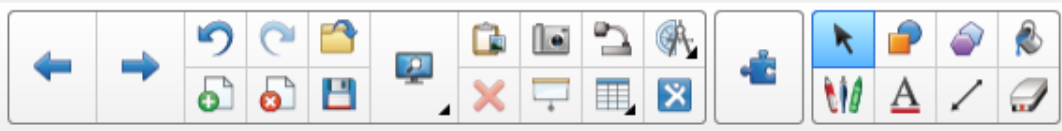

What is a network?

Do you have more than one computer at home? Are they connected?

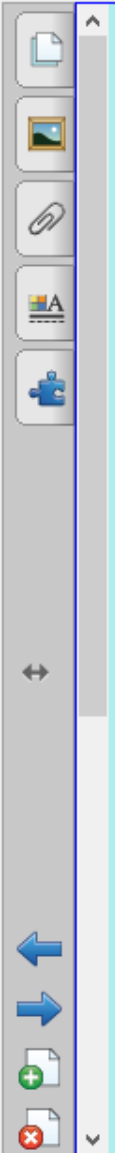

Can you use/view things across different devices? How does that work?

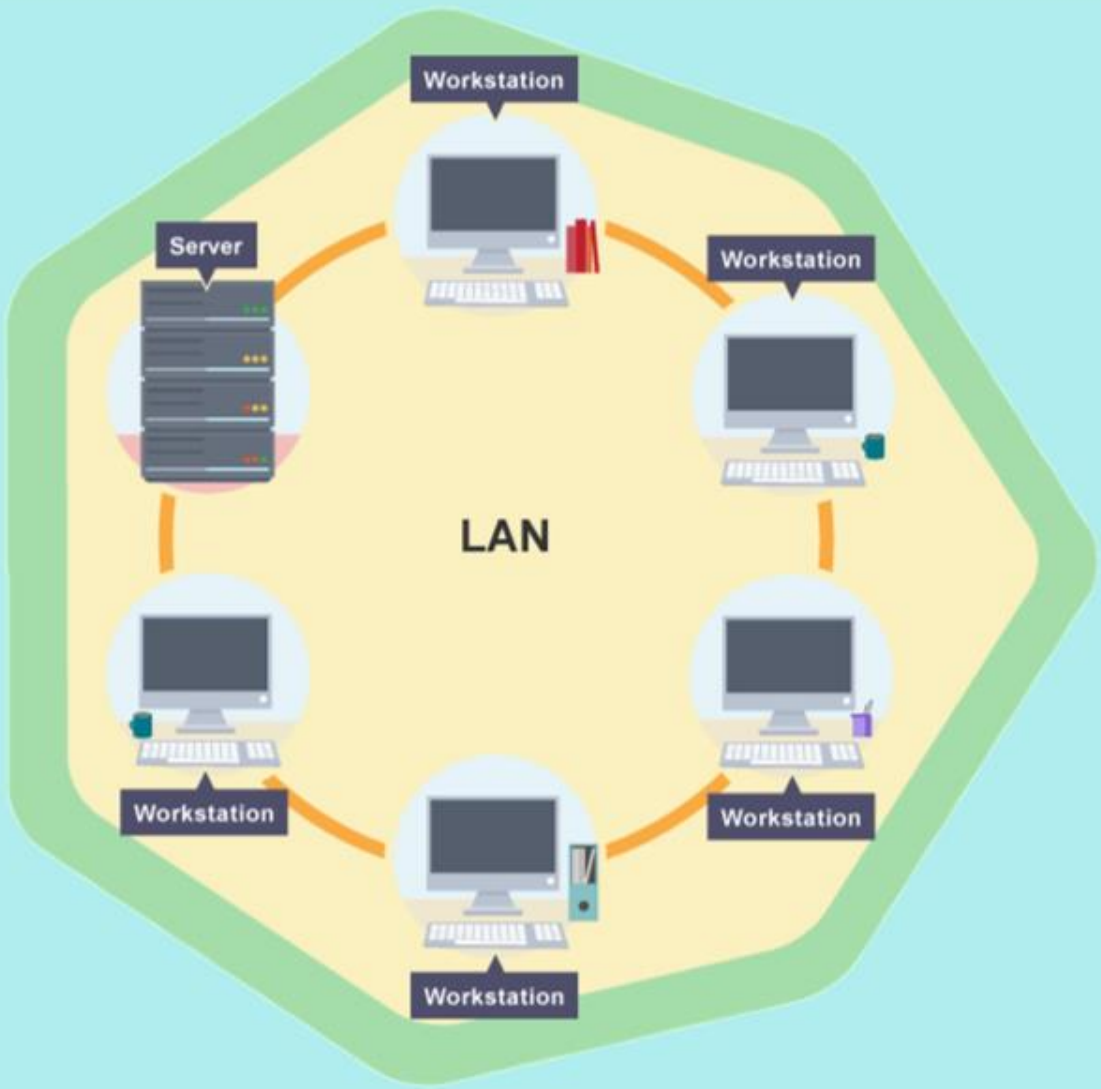

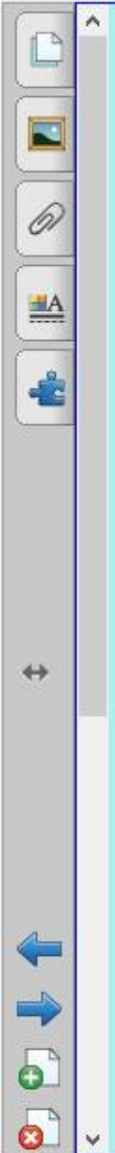

When devices are in a network they can share information e.g. documents, photos, videos, printers, phones, tablets.

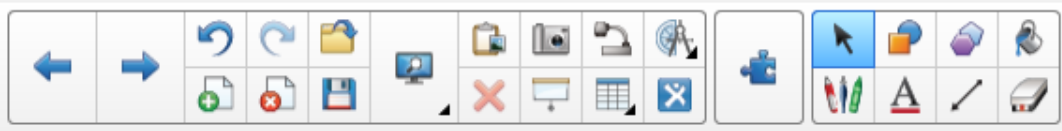

Can you think of any networks and how they are connected?

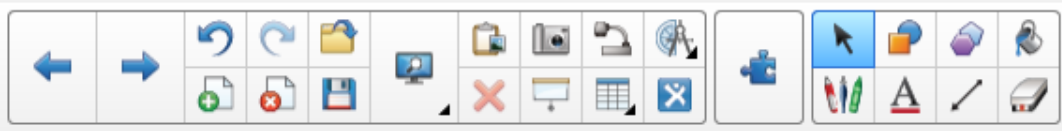

LAN?

WAN?

Let's create a LAN

Have a go at drawing a local network that you either have at home, or know is in school.
